Sparc

Co-funded by the European Union

TRANSFORMING CANCER CARE THROUGH PERSONALISED MEDICINE

SPARC (Support of Personalized Medicine Approaches in Cancer) is a **three-year EU4Health project** advancing equitable and sustainable personalised cancer medicine across Europe.

By uniting hospitals, universities, research institutions, and patient organisations, **SPARC builds the framework for implementing personalised medicine into real-world healthcare systems,** ensuring that scientific innovation translates into tangible benefits for all patients.

1. **Programme:** EU4Health (EU4H-2024-PJ-03)
2. **Grant Agreement No.** 101232874
3. **Duration:** November 2025 – October 2028 (36 months)
4. **Partners:** 17 organisations across 8 EU countries
5. **Coordinator:** Universidad Politécnica de Madrid (Spain)

Our Mission:

SPARC accelerates the adoption of personalised oncology across Europe by validating protocols for next-generation sequencing (NGS) and liquid biopsy, strengthening Molecular Tumour Boards (MTBs), expanding training and certification for healthcare professionals, and embedding patient engagement and health-equity principles in every step of the process.
